

## Parkinson's UK College of Experts

### Recruiting for new members to review non-drug approaches grants

The College of Experts is formed of scientific experts from all areas of Parkinson's research and additional areas of scientific technical expertise.

The College of Experts makes recommendations for funding for all stages of the project grants review process including non drug approaches grants.

As a member of the College you will be involved in reviewing innovative and creative non-drug approaches grant projects that will play a vital part in helping people living with Parkinson's manage their daily challenges and take control of life living with Parkinson's.

Some of the topic areas we receive applications in are:

- Exercise
- Technology aids
- Mental health therapies
- Physiotherapy
- Psychology
- Gait, Balance
- Speech and language therapy
- Health and social care
- Complementary therapies
- Occupational therapy
- Nutrition
- Dance
- Wearable devices
- Psychiatry
- Neuropsychology, dementia and cognition

We are looking for a broad range of specialists to join the College and review our non-drug approaches grants including researchers, nurse practitioners, creative art and dance specialists, physiotherapists, speech and language and occupational therapists.

Specifically, we are looking for professionals who have relevant and recent research publications in these areas.
